

I am appalled that the NAB is interfering with XM Radios First Amendment right to broadcast traffic and weather information to me as part of the service that I pay for. It is typical of entities that can't compete in the marketplace to run to the federal government seeking protection for their inadequacies. If the FCC sides with the NAB on this issue, it will confirm for me why I can not support the Bush administration. For all of the talk about free markets, this is hypocrisy at its highest degree. Shame on the NAB and on the FCC for even considering this request.
